## SUMMARY

Dedicated competitive programmer with a strong affinity for web development and cybersecurity. Proficient in Java, Python, and SQL, I've embarked on an exciting journey in JavaScript. On the front-end, I create dynamic user interfaces using React, while my back-end expertise revolves around Node.js. Proficient in MongoDB for effective data handling. Eagerly seeking opportunities to tackle challenging projects, fostering my growth as a versatile developer.

## EDUCATION

### Thiagarajar Model Hr. Sec. School

SSLC - 85.4%

HSC - 90.9%

2018 - 2021

### PSNA college of engineering and technology

Bachelor of Engineering (Computer Science)

cgpa-8.58

2021 - 2025

## SKILLS

- Programming: Java, Python
- Web Development: JavaScript, HTML, CSS
- Frameworks: Flutter, React, Node.js, Next.js
- Databases: MongoDB, SQL
- Problem Solving: Algorithms, Data Structures
- Version Control: Git
- UI/UX Design: Responsive Design, User-Centered Design

## CERTIFICATIONS

- flutter app development - Udemy
- Problem solving basic - HackerRank
- Problem solving intermediate HackeRank
- SQL basics - HackerRank
- SQL intermediate -HackerRank
- Python Basic - HackerRank
- java Basic - HackerRank
- Technical Support Fundamentals- Coursera
- bits and bytes of CN - Coursera
- Operating System- Coursera

## PROJECTS

### Student Management Web Application

- Built a comprehensive student management system using Node.js, Express.js, and MongoDB.
- Created functionalities to manage student profiles, semester marks, and attendance records.
- Implemented a user-friendly interface for students and faculty members to access and update data.
- Collaborated with a team to integrate version control using GitHub.
- Effectively communicated and coordinated tasks using tools like AnyDesk for remote collaboration.

### Vee Chat - A Social Chatting App

- Technologies Used: Flutter (Dart),Firebase Authentication, Firebase Cloud Firestore,Push Notifications.
- Developed a feature-rich chatting app using Flutter and Firebase, enabling users to connect, chat, and engage in a friends/following relationship.
- This project reinforced the importance real-time data synchronization, and responsive development practices. It also provided valuable experience in integrating third-party services for authentication and data storage.

### SaveAll Editor - File Management Desktop Application

- Technologies Used:JavaFX,ava File Handling
- Developed a robust desktop application, "SaveAll Editor," using JavaFX and Java, designed to streamline the process of saving and managing files on a local disk.
- This application simplifies the task of organizing files by enabling users to save multiple files concurrently with their respective names
- This is used to save all the file with same name

## ACHIEVEMENTS

- Knight badge in LeetCode - max Rating(2114)
- 3 star Coder at CodeChef
- Institute 5 th rank in GeeksForGeeks
- 2 nd place in TOP CODERS'23 by sudharsan college of engineering and technology
